

We will:

- ♦ Set out 10-year rolling capital investment plans.
- ♦ Develop a comprehensive plan to electrify the overwhelming majority of the UK rail network, reopen smaller stations, restore twin-track lines to major routes and proceed with HS2, as the first stage of a high-speed rail network to Scotland.
- ♦ Invest in major transport improvements and infrastructure. We will:
 - ❖ Deliver the Transport for the North strategy to promote growth, innovation and prosperity across northern England.
 - ❖ Develop more modern, resilient links to and within the South West peninsula to help develop and diversify the regional economy
 - ❖ Complete East-West rail, connecting up Oxford and Cambridge and catalysing major new housing development.
 - ❖ Ensure London's transport infrastructure is improved to withstand the pressure of population and economic growth.
- ♦ Work to encourage further private sector investment in rail freight terminals and rail-connected distribution parks. We will set a clear objective to shift more freight from road to rail and change planning law to ensure new developments provide good freight access to retail, manufacturing and warehouse facilities.
