

a better country, opportunity must belong to everyone and not just a few. We will lend a helping hand to all those who need it, but we will also ask more of individuals and communities. We can only rebuild our country if everyone plays their part and feels they have a stake in society.

We believe in living within our means. We will not make promises we cannot keep, and we will not introduce changes unless they are funded. There is not a single policy in this manifesto that is funded by additional borrowing. Not a single one.

Our plan is to build a secure, prosperous and more equal country open to the world, in which everyone has the opportunity to get on and do their best. We will provide strong and effective government but everyone will need to contribute and play their part. It will be hard, but working together we can do it.
